Company Profile

Branding, web development, management systems and digital services — designed and built in Nairobi, Kenya.

brand. design. build. — kingscreation.co.ke

Who we are

Kings Creation Digital Solution is a Nairobi-based digital studio. We brand, design and develop — taking businesses from first sketch to shipped product with one accountable team.

Founded by Stephen Kingori Kamau, the studio serves SMEs and startups, shops and supermarkets, schools and hostels, landlords, NGOs and professional firms across Kenya and beyond.

What we do

- Brand identity — logos, business cards, company profiles, posters and full identity packages.
- Websites — portfolio, business and e-commerce sites, with hosting, domain and email setup.
- Management systems — POS, property and hostel management, built or configured for your workflow.
- Digital services — SEO, social media setup, Google Business, product photography and video editing.
- Hardware — laptops and tech accessories, supplied tested with after-sale support.

Our own platforms

* Kings Creation POS — point-of-sale for shops, supermarkets and restaurants.
* Makaazi Manager — rent, units and tenant management for landlords and agents.
* KingsLearn (kingslearn.co.ke) — free and paid online courses under the Kings

Creation Foundation.

How we work

We start with your problem, not a sales pitch. After a short brief we map the smartest route — an existing product, a custom build or a design package — then send a fixed quote and timeline.

Payment: M-Pesa or bank transfer, deposit to start and balance on delivery. Every build ships with a support window, and maintenance plans keep it running.
